

OAK RIDGE NATIONAL LABORATORY

MANAGED BY UT-BATTELLE FOR THE DEPARTMENT OF ENERGY

The 31st ICFA Advanced Beam Dynamics Workshop on Electron-Cloud Effects "E-CLOUD04" Napa (California), April 19-23, 2004

Sponsored by LBNL, CERN, ORNL, SNS and ICFA

Main website: <http://www.cern.ch/icfa-ecloud04>

Fifth and Final Announcement (April 16, 2004)

- (1) Participants, program and schedule. Please check the [E-CLOUD04 main website](http://www.cern.ch/icfa-ecloud04) for the most recent schedule of talks. A list of participants is now or soon will be posted. We will have a hardcopy booklet of abstracts available at the hotel on Monday morning, along with a hardcopy of the schedule.
- (2) Presentations. If you have not done so already, kindly email your presentation to Tom Gallant ASAP (TGGallant@lbl.gov). In preparing your files, please be sure to follow the instructions described in the 4th announcement, and bring an electronic backup with you.
- (3) Paper submission. The **deadline for paper submission will be May 28, 2004**. There will be no page limitation, but you **must use the JACOW templates**. Go to the JACOW website (<http://accelconf.web.cern.ch/accelconf/index.html>) and choose "Templates" at the top left of the page. We will need from you the original document (either Latex or Word), postscript figure files, and a PDF version of the completed paper. Please do not use fonts other than Times and Symbol in the text nor in the figure labels or callouts.
- (4) Registration. Our conference room at the Napa Embassy Suites is called "**Pinot Noir**". Registration will begin Monday morning. Look for Kathleen Brower near the conference room.
- (5) Weather forecast. Doesn't look great. Bring your umbrella.

See you Monday!

Miguel Furman (mafurman@lbl.gov) (for the organizing committee)
